Patent No. 6333152

GENERAL INFORMATION:
APPLICANT: Kinzler, Kenneth
APPLICANT: Zhang, Lin
APPLICANT: Zhang, Win
TITLE OF INVENTION: Gene Expression Profiles in No. 6333152mal and
TITLE OF INVENTION: Cancer Cells
FILE REFERENCE: 0107.4664
CURRENT PELING DATE: 1999-05-20
EARLIER APPLICATION NUMBER: 60/047,352

ARALIER PLING DATE: 1997-05-21
NUMBER OF SEQ ID NOS: 871

NUMBER OF SEQ ID NOS: 871

SOFTWARE: FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ;

Sequence 5, Application US/09625634A

Patent No. 665348

GENERAL INFORMATION:

APPLICANT: Vernet, Corine

APPLICANT: Herrmann, John

TITLE OF INVENTION: NAT-7B-LIKE POLYPEPTIDES AND NUCLEIC ACIDS ENCODING

TITLE OF INVENTION: SAME

FILE REFERENCE: Cura-244 (15966-744) US

CURRENT APPLICATION NUMBER: US/09/625,634A

CURRENT FILING DATE: 2000-07-26

PRIOR APPLICATION NUMBER: USSN 60/194,256

PRIOR FILING DATE: 2000-04-03

PRIOR FILING DATE: 2000-04-03

PRIOR FILING DATE: 2000-04-03

PRIOR FILING DATE: 2000-04-03

NUMBER: OF SEQ ID NOS: 6

SOCTWARE: Patentin Ver. 2.0

SEQ ID NO 5

LEEGTH: 15

Sequence 830335, Application US/10719900

Publication No. US20050026164A1

GENERAL INFORMATION:

APPLICANT: Xue Mei Zhou

TITLE OF INVENTION: Methods of Genetic Analysis of Mouse

FILE REFERENCE: 3528.1

CURRENT APPLICATION NUMBER: US/10/719,900
